

SCI - Class of Spinal Cord Injury

Overview type of Spinal Cord Injuries (N=140)

Severity of the Spinal Cord Injury

Level of SCI lesion

SCI - Results of Stem cell Treatment

Complete and incomplete spinal cord lesions (N140)

*Getting back feelings in parts of their legs and experiencing pain sensations were reported as negative effects by 2 patients

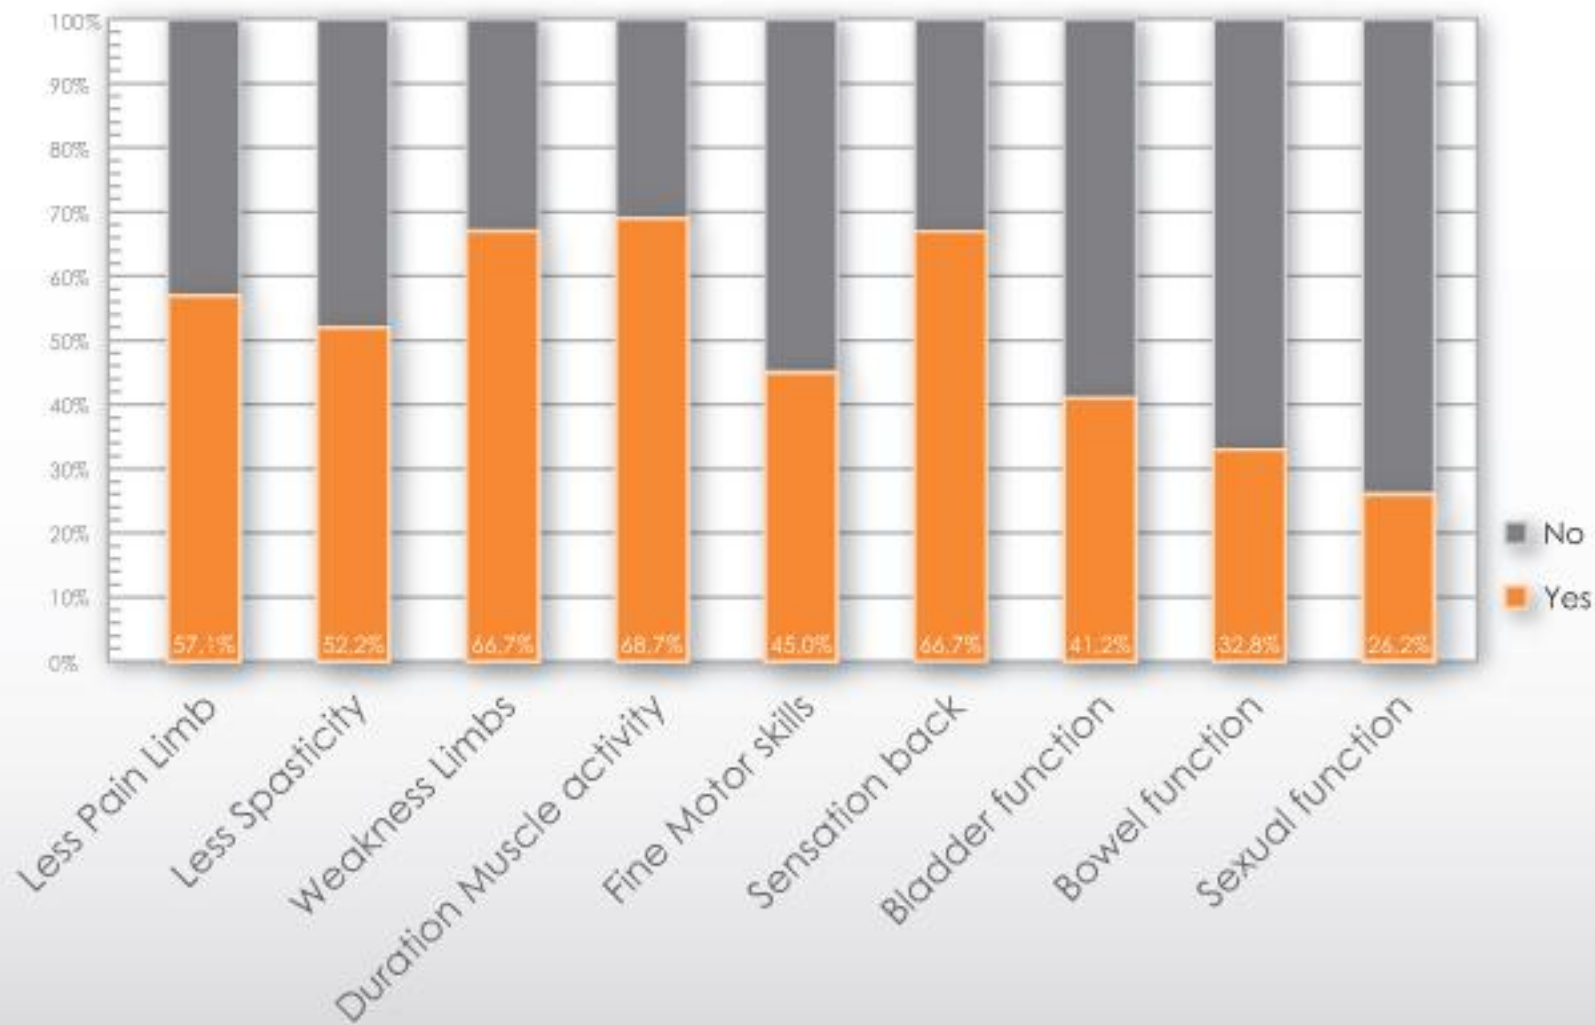

SCI – Results of Stem cell Treatment

Efficacy by Complete or Incomplete Spinal Cord Injury (N=140)

Table: Improvements by type of Spinal Cord Injury
(complete or incomplete lesion / N=140)

	Improvements Counts (%)	No improvements Counts (%)	Total SCI patients Counts (%)
Complete SCI	32 (64,0%)	18 (36,0%)	50 (100%)
No Complete SCI	49 (54,4%)	41 (45,6%)	90 (100%)
Total SCI patients	81 (57,9%)	59 (42,1%)	140 (100%)

Type of improvements SCI (n=81/N=140)

Overview changes in Group with ASIA Scores

Asia Scores n=43 (Mean with 95% confidence Intervals)
